

## Asking the Important Questions

---

### Student Instructions

- 1 In the Xello lesson titled **Exploring Career Factors** you identified a list of important questions you'd ask to make sure that any career you're exploring aligns with your top factors. From your Xello dashboard re-open this lesson to find this list of questions (under section 4), select and copy the whole list, and then navigate to one of your saved careers.
- 2 In the **My Notes** card under **Explore This Career** paste your list of questions to guide your investigation into 6 common factors that influence career decisions.
- 3 Work through your list of questions one by one, reviewing the career profile to help you determine how well the career ranks on each factor.
- 4 In the **Important Factors** card under **Explore This Career** record a star ranking for each factor based on your review of the career profile using your list of questions from the Xello lesson.
- 5 Rank the **Important Factors** for 2 more saved careers. Make sure to copy and paste your list of questions into the **My Notes** card for these careers as well.
- 6 OPTIONAL: After ranking the **Important Factors** for 3 saved careers determine which career came out on top. In the **My Notes** card of this career, add a written reflection for 3 of your important questions.
