

## What Do Professionals Value?

---

### Student Instructions

Investigating how someone else's values have influenced their decisions, may help you to evaluate how your own values may influence your decision making.

- 1 In Xello, select 3 saved careers and read the interviews with professionals. Pay close attention to their **Pros, Cons,** and **Advice** section as these may reveal key work values for you to consider. But keep an open mind, since the workplaces of the future may look very different than they do today!
- 2 After reading each interview record your response to the following within the career's **Likes and Dislikes** card:
  - **Likes:** What is one work value you like about this career?
  - **Dislikes:** What is one work value you dislike about this career?

**Tip:** here are some common work values to consider: power/management, sense of belonging, competition, creativity, teamwork, self-improvement, variety, routine, recognition, challenges, pressure, advancement, adventure, security, flexibility, and altruism.
