
Meme Yourself

The way someone sees something is called a perspective. A person's perspective on you comes from what you do and say when you're with them. Not everyone sees you the same way. The way you act with your parents might be very different from the way you act with your friends.

Draw a picture and add a short phrase to show how others might see you.

How my parents see me

How my teacher sees me

How my friends see me

Name: _____
