

Xello assessments

Xello's assessments are designed to help you build self-knowledge. By connecting your interests and skills to future career and academic options, these tools help you envision a future that actually excites you.

You can jump into any of these assessments from your **About Me** page or in the **About Me** menu of any page.

- **Matchmaker (Interests):** Discover how your likes and dislikes align with hundreds of career options.
- **Personality Style:** Use the Holland Model to see how your unique personality traits fit into the professional world.
- **Mission Complete:** Fine-tune your career matches with a final set of interest-based questions.
- **Skills Lab:** Identify the specific skills you want to use most often in your future career.
- **Learning Style:** Find out if you are a visual, auditory, or tactile learner to help maximise your study habits.

Matchmaker (Interests)

The **Matchmaker** quiz asks about your likes and dislikes to match you with careers that line up with your interests. It's broken into three phases that refine your results as you go.

Phase 1: Matchmaker – Gives you your first set of career matches based on interests that relate to the most central parts of a career.

Phase 2: Personality Style – These questions help match you with careers popular among professionals who have a similar personality style to yours.

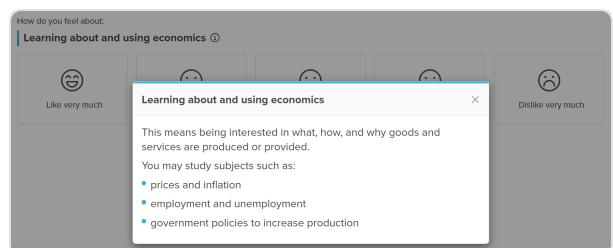

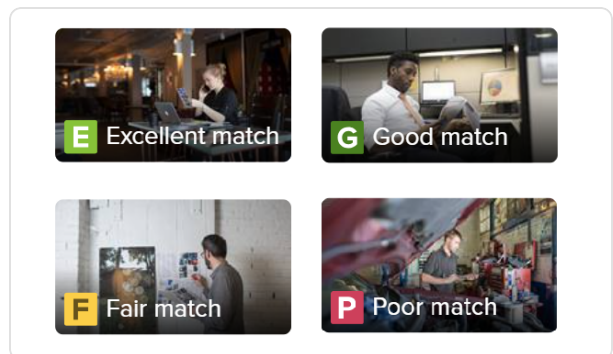

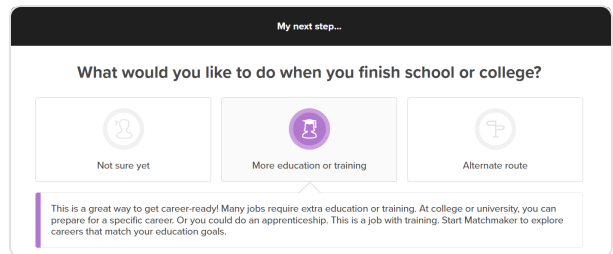

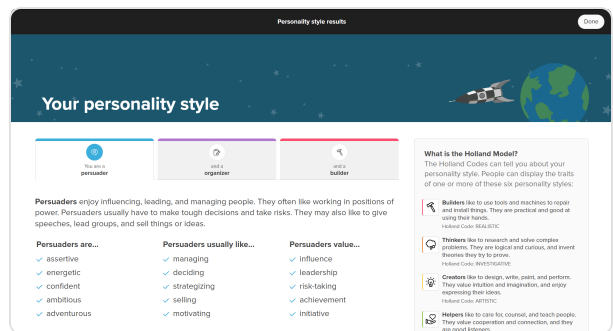

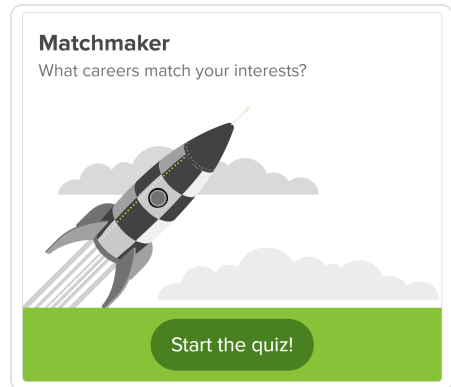

Phase 3: Mission Complete – The final phase that fine-tunes your career matches even further. You'll get the best results by finishing all three phases.

Good to know

First question: You'll be asked what you want to do when you finish school or college. If you don't know yet, that's okay! You can change this answer anytime on your **About Me** page.

Strength of match: Once you finish the first phase, you'll see a "strength of match" rating (like "Excellent" or "Fair") for every career in Xello.

Need help? Click the info icon next to any question for more information or clarification.

Skills Lab

Skills Lab is available for students in year 10 and above and focuses on the skills you'd like to use most often in your future career.

No pressure: This isn't about how good you are at something right now. It eliminates the anxiety of "testing" your abilities and instead focuses on what you actually enjoy doing.

The quiz: You'll rate 35 key skills based on how frequently you want to use them.

The results: Once finished, you'll see your top five career matches based specifically on the skills you'd most like to use.

Understanding your results

Your career matches are a starting point for exploration, not a final decision. Xello gives you the tools to see exactly how the "maths" worked for your matches. You can view how you got your results from the top of any career profile, by clicking **Find out why**.

You can view tabs that show your overall results with the combination of your **Matchmaker** and **Skills Lab** answers.

Open the **Matchmaker** tab to view only how your interests align to the career.

Or, open the **Skills Lab** tab to check out how the skills you'd most like to use align with the career.

Change your mind? You can review and change your answers at any point. Because your interests will grow and evolve over time, it's a great idea to update your assessments regularly.

In the **Matchmaker** results tab, click the dropdown with your answer to select a new one.

For **Skills Lab**, under **Your desired use**, open the dropdown to pick a new answer.
