Plans in Xello

Thinking about life after school or college? Make a plan for whatever comes next. Whether you want to start a job right away, join the military, become an apprentice, or go to university, create a plan to map out your future.

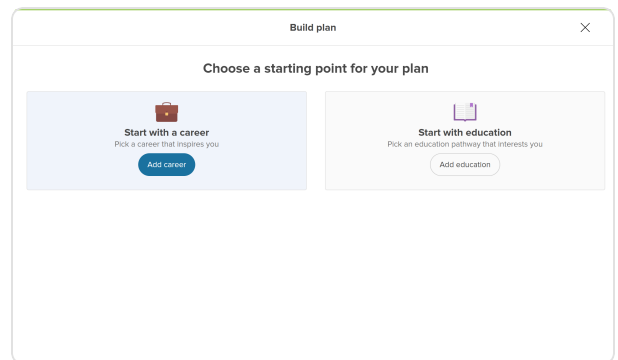

Access plans

Click **Plans** in the top menu, or begin creating one on the **Goals & Plans** page.

Career or school?

When you create a new plan, you have two choices:

- **Start with a career**: if you already know what job you want and want to figure out how to get there.
- **Start with education**: if you know what path you want to take (like going to university or taking a gap year) but aren't sure of your exact career yet.
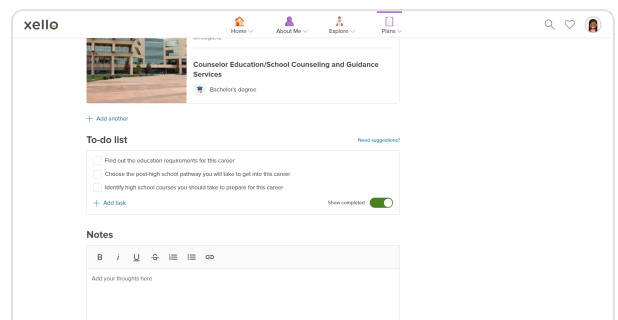

Build and edit your plan

If you chose career: pick one of your saved careers or search for a new one.

If you chose education: select a pathway from the list (like apprenticeship or military). If you aren't sure what these mean, click the **Learn more about pathways** link to watch videos and read a profile.

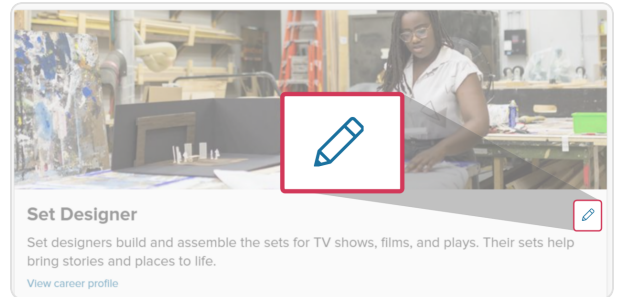

Use the **To-do list**: every plan comes with a checklist of small steps to help you reach your big goal. You can click **Need suggestions?** to find more ideas.

You can also add notes to yourself.

Edit anytime: change your mind? Click the pencil icon to change your answers or the name of your plan.

Rank your plans

You might have more than one idea for your future, and that's okay! You should create a different plan for every path you're considering. Once you have a few plans, rank them to show which ones you like best.

Drag and drop the plan where you'd like it to go. Or click the three-dot menu and select whether you want it to move up or down in the list.
