# **Quick Sketch**

## **Inquiry Prompts**

- What is a community?
- What communities do you belong to?
- Does everyone in a community have to be the same?

### Instructions

The purpose of this activity is to have students show what they already know about communities by sketching their idea of a community.

- 1 Ask students to sketch a picture of a community. They can do this on their own, or collaboratively in small groups.
- 2 Have students explain their sketches. Reinforce the types of communities they identify, and fill in with your own knowledge about what makes a community.
- 3 Explain to students that while a community is often thought of as a place, it can also refer to a group of people. Give them some examples:
  - Place: country, city, town, neighborhood, school;
  - People: family, classmates, teammates, etc.

Message for students: While communities can form around similarities, differences are what make communities unique. Belonging doesn't mean being the same, but simply feeling like you're accepted by others for who you are.

### **Materials Required**

- Paper
- Pencils, colored pencils, or markers
- Computers (tablets, phones) with Internet access (if you want students to upload their artifacts)

#### **Artifacts**

Upload students' sketches to Storyboard, where they can reflect on what community means to them. You can also create a display in your classroom.
