xello

# Xello's dashboard feed

Xello has a new dashboard! You'll still find the same features like **Assessments**, **College Planning**, **Lessons**, **Assignments**, and more, but now with the addition of the feed.

How the feed works

The feed is fully personalized to you. It's based on your saved careers, schools, majors, and the topics you're most interested in. So the more you interact with features in Xello, the more personalized the feed will be to you and your interests.

To change or narrow the focus of the feed, click **View topics** and select your favorite topics.

As you browse the feed, show your interest in the topics with a reaction.
